l'm confused.Let X = 0.99999...(ad infinitum)Then 10X = 9.99999...So 10X - X = [9.99999...] - [0.999999...]Therefore <math>9X = 9X = 1Cute, ain't it?

Let me see; bank deposits in the billions; round off that fraction according to Charlie's math and deposit it in a seperate account; under my name of course; and a finders fee for Charles. Works for me.
