This movie is a disappointment when compared to the original, but good enough to see on the big screen. But there is a sex scene with kate b that makes the movie....

I was anxious to see that one too, but maybe I'll wait to see it on DVD.

I _always_ wait.One of my picks to reserve at the library was Fantastic Four.Jessica Alba was more fantastic in Sin City. In F4 you gotto look down her blouse a couple times but that was about it.I spoze I'll be waiting a while longer for the Star Wars Showand War Of The Worlds. No rush.First Underworld was good as was Equilibrium-- an underrated SF showif there ever was one. I have more respect for Christian Bale ashe takes new roles like Batman-- a really superb Batman except for thewheels.

I liked the movie a lot too, enough that I plan to buy it when it's out on DVD. But I think they probably don't decide on a DVD release date until theater attendance dies down. I'm thinking it will probably be a month or two.
