Help !!! i just picked up a set of vintage speakers, i'm wondering if it's going to be possible to connect them to a TEAC AS-100 amplifier? What will i need? The speakers came with 2-PIN DIN jacks but no cables etc. I'm totally unfamiliar with this.

See image attached for input and outputs for the speakers and amp.

Any help much appreciated.

Thanks.

Can you post a close-up photo of the connector panel on your speakers? It looks like they may have RCA connectors, but I can't tell from the photo.
