Forgive me, Wayne, but we had a baby and we've got to make room!

For sale: Pi-4 Pro (J) speakers from 2002, built with JBL 2426 compression drivers and JBL 2227 woofers. Max power 600W, 100dB/W efficient. Wow. Cost me \$3000 to build (kit was \$1699), yours for \$1000. Local pickup (Lexington, MA) only, these things are heavy.

Custom cabinets pictured here:

Here is my review:

http://www.pispeakers.com/catalog/product_reviews_info.php/products_id/108/reviews_id/2

The speakers are in excellent shape, cabinets are clean and free of scratches, drivers untouched by human hands, and probably have never seen more than 10W.
