Subject: Info request about Pi-one/two and subs

Hi,
first of all, sorry for my bad english!
It's a lot of time that I'm interested in Pi speakers and now I decided to finally have the first couple!

I would use with them my two tapped horn subwoofers, so I have to decide between Pi-One and Pi-Two...
I think that with a sub, maybe Pi-one is the way to go, isn't it?
Could I please have the plans of Pi-1 and Pi-2?
Thank you very much!
And is it possible to order these kits without the crossover components?
Finally, (I know I'm asking too much! ), with the plans could you please send me the shipping cost to Italy for a couple of these kits?
Thank you again and best regards!

I'll send plans. We do ship to Italy, however, shipping has become quite expensive. It may be better for you to source the components locally. You can check the prices on the shopping cart by adding items and beginning to check out. Enter your address and it will calculate shipping costs by several shipper methods.
