Subject: iLive T80 question

Good morning.

I'm trying to set up an Allen & Heath iLive T80 sound board in the new tv studio we're building at the college I work at. My background is video, so I'm having a problem.

We're wanting to set up a mix/minus audio feed from the control room to the studio. Just so we're on the same page, we want to feed program to the studio, minus the microphones from that studio.

I'm assuming I need to set up a different output from the board (not the program out), but I'm unsure as to how to do this.

Any suggestions will be appreciated. Thanks.
