I got an email from a guy named Jakub telling me about his website, and inviting me to try his room mode calculator. Looks like a pretty cool tool, so I thought I'd post it here.
Room Mode CalculatorWe're always talkin' about room modes, multisubs and flanking subs so it seemed very apropos for the Room Acoustics forum on AudioRoundTable.com.

Enjoy!

Hi, Good stuff, for a simpler calculator check out the one below. It is in excell and works fine. There may be other versions that work on other operating systems.
