Oh, that's cool, Mike!I'll check that out this evening, and I'll send a link to one of my mechanical
engineer friends too.Thanks!Wayne

and my limited, painful experience with FEA, it looks like a very sophisticated program.I'm thinking
an individual (vs a company) would have a hard time justifying the purchase price.There are free
versions of Nastran available that will accomplish the same thing, but it's one hell of a lot harder to
manipulate than the FINECone program appears to be.
