Damn, I love this time of year when they start showing the Warren Miller movies. Just got done watching "Cold Fusion". I wish I had the talent to ski like one of those guys!! Heck, I wish I had talent of that caliber to do anything. Amazing!!!

Never heard of him. What is "Cold Fusion" about? Is it about the theory of causing fusion at relatively low temperatures, or is that just the name of the movie? What other movies has Miller done?

Warren Miller is a god when it comes to snow skiing movies. He's been making them for 30+ years. SPECTACULAR footage of the worlds best alpine and freestyle skiing from all over the world. Really cool to watch.  
Movie trailer
