I really, really enjoyed this movie, but I have to admit to being a big Jason Stathom fan. It's a big time action movie, so crank up the surround sound. It's story line kept me involved during the entire movie.

I have this one in my NetFlix list. Stathom has become one of my favorites too. Caught me by surprise in Transporters, which I thought was going to be stupid by the name. Don't really know why, actually, but I did. Then I saw a few minutes of it clicking by channels one day and was hooked, so I rented it. I thought it was great so I started getting other movies like it. This is one of them, and I'm looking forward to my little red package from NetFlix.
