"Imagineering" - almost thought that said imagining, haha. Maybe you could scan the article for us to read? Is NZ north island still flooded? I saw it on the news, looks pretty bad. Lucky you're down on the south one ;)

Hi Mike, Thanks for the heads up. I have subscriptions to a lot of electrical engineering magazines, but I'm not familiar with that one. I'll have to check the shelves and see if it's available here. I'm sure it must be, so I'll check in the bookstores next time I'm there. Wayne
