Does anyone else here have a Rotel amp for their stereo system? I had no idea when I bought my Rotel RA 412 amp 30 years ago that it would outlast so many stereo components. I still have the Jensen speakers, too.

Man I am so with you I bought one about 16 years ago and It's still living, when I first bought it I had my doubts but at the same time it was something about it that caused me to say might as well try it out. And to this day its still doing its job. So you aren't alone.

My folks bought a rotel amp awhile back and it is still lasting too. It still works today. I would recommend this amp to new buyers everywhere. Crystal

sure - I still have my Rotel RA412 and my Rotel tuner, Garrard deck and wharfdale speakers, all in good order except for the deck and bought thirty years ago. No sure what to do with them! I remember Jensen speakers well...
