Information and buildup pages on the Ella amp are few and far between compared to other tube kits on the market. It would be nice to compile a page of pictures, mods, reviews,etc. Any other users interested? I believe it's a good enough product to warrant more interest, a modern day ST-70 of sorts. Regards, Jerrod

sounds like a great idea, if you've got one, I'd be interested in seeing photos and your audio impressions
