Hi Guys. Michael Percy has some foculpods/polipods that seem to work well and cost only \$2.95 each. They are extremely non resonant, soft, but do have a stickiness to them. One might use a small piece of wax paper underneath the feet. Hope this helps. Steve

Good suggestion, thanks. I know I should know where to find Michael Percy online, but could you provide a URL?On a related topic, see the post from manualblock in the Turntable forum.
