You might run this by David Cope at Triode & Co. and Frank Stuppel at FSAudio. Both are American dealers, and both are sponsors here. So I don't know that they can help, but they might. I know that Audio Note does business in the U.K., and Triode and Co. is the Audio Note distributor for the United States. So maybe David can help. I also suspect that Frank has connections in the U.K., so I think he may be able to offer some suggestions. It sure can't hurt to ask.Other people may know of specific places and other options. I thought I'd suggest Frank and Dave in case other replies were slow in coming. They may have some good recommendations for you.
