I'd like some opinions on this product, especially if you have used one. The site itself makes me nervous because of the big name testimonials. (I know they could be genuine so trying to keep an open mind.)

What are you planning on using it for? I haven't used one, but from what I can see it sounds like it would be good for simple projects if you don't have the space or money for a studio...but it won't give you flawless results.
