Are there any good audio magazines anymore? Some years ago, there used to be a magazine that was literally titled "Audio". With the growing technology, why would a magazine like that fail? Is there another one that I am not aware of?

Don't forget that a lot of magazines are available in an online format. Not quite the same but they still make for good information sources. I often look at the Tone Audio page and I'm pretty sure Sound and Vision is still around in paper form too.

I personally really enjoy reading Sound and Vision magazine. I think it's one of the best. If you want, there are also a lot of websites that have wonderful information. Just type in audio magazine in Google and you'll find a lot of things.

You are so right! I actually look at several different magazines online. I wonder how their actual sales are doing now that a lot of people are doing that?
