Just wondering if anyone else has downloaded the APE Jukebox?

A friend of mine has it, and tells me I should get it, but I don't know that it is really something I would need. As far as I can tell, the only thing it does that is really nice is the way it displays the cover art. Other than that, I can't see why I would want to purchase it.

I've never seen anything like this before but that seems really cool. I'll take a look and tell you what I think of it.
