Is was browsing through the (rather old) smith-horn thread but could not see the pictures, I got redirected to flickr. Is there someone who has these posted somewhere because I'm very interested in building a Smith-horn.

I would be very pleased seeing some build pics!

All other DIY smith-horn info is welcome!!

thanks, Jim

This is the best diagram of a Smith Horn that I could find. It is said that the horn itself does not amplify the sound but improves the coupling efficiency between the speaker driver and the air resulting in a greater acoustic output.
