Has anyone played the recent DJ Hero games on their video game console? I think it's a great concept for a game and a nice change of pace from the usual music games. I also think it's neat how you use a mock turntable.

I have not ever played it. Is it like playing a real guitar, more realistic than guitar hero that is? I don't like guitar hero, I have a problem with the colors and it just doesn't feel real to me.

It's more complicated than Guitar Hero, as there are a variety of placements and styles for the buttons. It's more than just matching colors; you actually have to scratch like you are a DJ.

It was more challenging for me than Guitar Hero, but you have to scratch like a DJ the same way you have to use the whammy bar in Guitar Hero. It's a very fun game, but a similar concept to Guitar Hero.

I haven't played it but it looks like so much fun. I'm not sure how good I would be at it, but I'm sure it would be something to neat to learn. I love trying new games. Everything nowadays is so cool.
