Can the JBL 2118 be used in the midhorn instead of the emminence 10". If so, what needs to change if anything.

Thanks,
Robert

I didn't test the JBL 2118 but the JBL 2012 is an optional driver I've used. It requires slight crossover changes, as shown in the schematic.

Am I missing the schematic or is it somewhere to be found?

No I do not have them. Please send.

Robert
