Hi Wayne,

In the Pi speaker price list, it lists the 3Pi size as 30"x20"x14" and th 4Pi size as 26"x18"x14". Is this correct? I was thinking about the 3Pi, but if the 4Pi is actually smaller, it may make more sense for me.

Thanks,

Warren

are in the upgrade options, to be quite honest. Once you move to the upgraded drivers of either model, you get significantly better sound.
