Finally, finished adjusting the B & C 250s and crossover from some Pi 3s and converted them to run with Omega PRO (with waynes help of course). Anyway was well satisfied with the sound running through a lab gruppen 2 way crossover (at 80hz X over point) running with a Quest 4000watt amp and a Yorkville 4000 watt amp - serious head room!!!

Great sound will never need much more than this for most of my gigs - brilliant sound in every respect! Too bad I don't have the 4 pi stickers for the cabinets - sorry Wayne. Will let people know that ask to be sure.

Thanks!!!

Those look great! Glad they're working out for you. E-Mail me your postal address and I'll send you a couple decals.
