I am contemplating selling my ART Arrays to try some other types of speakers. I don't have room to experiment unless I start unloading some other gear,so.....

If you want to see what they are all about, here is the link:

More info on ART Arrays

Here are some pics of mine. The cabinets were built by FredT (the original designer)and stuffed by me. They are in excellent shape as are the drivers. The crossover board can be switched between 1st order and 2nd order on the board. More or better pics on request.

JMy ART Arrays

I'm thinking \$600 for the pair, local pickup (Amarillo, TX) or I'd be willing to travel 100 miles for delivery. Shipping is not an option. I can also deliver them to Dallas at LSAF in May.

OK, up for sale.

\$550 and same shipping restrictions. This is what I have in them in parts cost alone (Drivers, xover, and cabinets--not including finishing, etc....).

Would also trade for a good working turntable of equal value.

No takers? Price too high?

Looks like they will most likely go on the local craigslist or in our garage sale then. Was hoping to let them go to one of the forum members.
