Anyone have a schematic for this unit? it has started to intermittantly create little trnsients that make my woofers dance when it happens, isn't the tubes. it has a funky muting circuit of some sorrt I,m starting to suspect it. I have the original owners manual, but not the service manual.Thanks in advance, Russellc

The Dynaco's do that with bad filter and coupling caps. My 2c from experience. The Lytics also in the power supply.
