I've been put in charge of identifying items in my grandfathers belongings for his estate. I am looking for either information on, or even a buyer for a Montgomery Ward airline table, that has a working am/fm radio turntable (with good needle) and 8 track player. I have pictures if anyone is intrested, please just let me know I would be grateful for any information, or inquiries.

I have never seen or heard of such a thing, but it is tight. I wish I had the space for it. OMG, I just love looking at this picture. Could you post a close up of the eight track?

Thanks for the picture. I remember my grandad's set up. However, it definitely didn't look anything like this. I remember how amazed I was about the eight track. Who would have thought how far we would go in such a short time.

This somehow looks very modern, yet an 8-track system would have to be 20+ years old. At any rate, he kept this in great condition. Especially since the color is so white - you would think it would be a little dinghy by now...
