I cannot stand cars going by my house or next to me while driving/idling with their music blasting. I understand turning up the radio for a good song but constantly listening to it at a obnoxiously high volume is rude to anybody around you. Is it just me or do others find that just plain rude?

Yeah, I think it's a punk thing to do. If you have a loud stereo, turn it down at stop lights and in neighborhoods. If you have a hot car or motorcycle with loud exhaust, don't rev it under bridges, roll on slow. When I see someone gun it under a bridge, I think to myself, what a punk. Same with the buning buzz subs at a stoplight. That's the definition of uncool in my book.

I wish there was a way to send a burst of noise through their system. I've noticed that these jerks even keep the volume up in hospital quiet zones.

Hi It sounds like a project in the raw.... design and build a sonic disruptor. A focused beam device that hoses up autos making over a moderate sound level. Perhaps frying the engine computers would do the trick... oh well an interesting thought. I agree that many individuals have no concept of proper behavior. They seem to live in their own private world and could care less if they cause problems for other.

Sorry - I'll try to keep it down. It's just that whatever I'm listening to is just so great and I think I

would like to share it with the world.
