Well my fostex 206's need some low mid and low end help. I hate to add an additional componet to the signal path but.... I need to have a little switchable tone contol unit of high sonic quality. Preferably a tube tone set up or a desceet component set up.Any sugestions!!!!Can any of you suggest a vintage ish eq I might consider that isn't going to add noise and destortion? Thanks for your help, Pete

Peter,Good EQs don't add any noise or distortion that you can hear. Try Rane, Ashley or some other brand. Use a prametric EQ. Don;t do any tone cotrols...those are fixed and will almost always distort the signal. -akhilesh

Thanks for your input, I've ordered the components from parts express for the correction circuit that Martin recommended. I hope to inally be able to listen to my new 206's by the end of the week. C Ya, Pete

Sounds good Peter! Please do post on the single driver forum with your experiences as you use the BSC. It will be helpful to all of us!-akhilesh
