What do you use for outdoor speakers? I know they have those brands that look like rocks but I haven't heard any that actually sound good.

I don't have separate speakers for outside. I have two sets of speaker wire for my indoor speakers. I hook up the longer wires for events outside. I don't have a huge outdoor space, however. This works for me.

We don't have speakers which are specifically designed for outdoor use, but I have a friend who has patio speakers from something like TIC brand. They seem bulky but the audio is fine, I suppose.
