Wayne I didn't think to ask are the speaker hookups that go on the back of the speakers in the kits?

They are included! I finished my build a few weeks ago and have to say the speakers sound amazing!

I built the 4 Pi's with upgraded drivers and Pi 3 flanking subs.

Sweet. Are they really super high end sounding speakers? Because those are the next ones I would like to build.

Holy crap they sound fantastic! Since I have hooked them up I have more than doubled the amount of time I spend listening to music. Absolutely destroy my Paradigm 9 se MkIII's and Magnepan MMG's.

Wayne is correct is ascerting that these are truely high end speakers, I prefer them to the Watt/Puppies I used to crave and spent a lot of time listening to in the hifi shop.
