Hi Wayne,

I wish I would have discovered your products before I built my 7.1 setup for my dedicated home theater. I thought my current setup was good but I heard a popping speaker the other day and realized my DIY build of a consumer grade type speaker may not have been the best choice for high SPL applications in a room with fully treated walls and bass traps.

I'll be keeping my IB sub though.

Thanks and I have a lot of reading to do!

-Tom A.
