Hi Wayne,

Eminence Omega15 used in 4Pi is not available. May I request you for a copy of 3Pi Plans as Delta12F is available.

Thanks !

Jay

Hi Maxjr,

I am located half the world away. The shipping costs as much the cost of the Drivers. It is much better to buy it locally. Thanks for your help.

Hi Wayne,

I also realized that 6Pi Corner Horn uses Delta12LF and Delta10 Woofers. Will it be better to

---

consider this for Home Theater application than 3Pi ? are the Corner Horns placed in the corner abutting the wall or offset from the wall ?

Thanks!

Jay

If you have the right corners, then constant directivity cornerhorns are definitely the way to go. But if you don't, then matched-directivity two-way speakers may be used with flanking subs to good effect. To learn more about each of these things, see the following links:

High-Fidelity Uniform-Directivity Loudspeakers  
Speaker placement and wavefront launch  
Room modes, multisubs and flanking subs

Wayne,

Thanks for the links. After studying these, I understand that for my room, the Corner Horns would be more suited. My I request you for a copy of the 6Pi plans ?

Wayne,

Thanks for the plans. I am not quite clear as to where does the mid woofer gets located ?

The woofer is in the bass bin. It is rear-facing in the constant directivity cornerhorns. Does that answer your question?
