I'd love to hear either of these speakers if some one locally has a pair they'd be kind enough to demo some time. THX!

Tulsa is just a four hour drive from Kansas City. So come visit me some weekend, and I'll let you hear both.

I did a project for VML in Kansas City a couple years ago, came in every Sunday and back home every Friday. It's a very pleasant drive.

Quite kind of you Wayne. I'll get my 2 Pi's built into towers (thanks for the plans) and see if this summer might allow me some date to come south and see you.

Hello, I've been using Wayne's venerable early variant of the 4pi speaker for some years now. The Theater 4pi. Uses the Eminence Delta 15 woofer and the Eminence compression driver & horn. While no longer in the product line up any more, I'm sure it's representative of the over all voice of the Pi sound. That is... BIG, VOLUPTUOUS, VIBRANT AND REVEALING! I'd be glad give a listen for you, right here in K.C.

Rick
