How much time do you spend listening to music in an average day? For some reason we started talking about this last night, and I probably listen to music somewhere between 8 & 10 hours a day. I know our radio and computer get way more use than our tv does!

Hi, When I was working, I had the Satellite radio going for about 9 hours a day in my office (feeding a tube amp and pair of Klipsch KG4 speakers) and 2-4 hours of quality stuff at night on the main stereo (not satellite).

Now that I retired, I usually listen about 4 hours each night to the stereo. Mostly vinyl.
