hello all,

does anyone have a mach one woofer from the first series for sale ? or even a single whole mach one speaker cab with drivers ?

i recently bought a pair at the flea market and one cab needs a woofer. i need the one that has the NO ROT rubber/foam from the first generation of production.

i can look at the number on the back of the woofer if necessary, it is in my shop and i can not remember the woofer number on the magnet.

i could be willing to purchase a mach one woofer or an entire single mach one speaker box with all working drivers to make my pair complete, all from the first series with the no foam rot woofer.

i know that they make replacements. however, i am an OEM kind of guy.

thanks for any help that anyone could give.

Hi Check Parts Express. I believe they now carry replacements for that speaker.
