Hi there,I am using the old faithful QUAD mkII tube monoblocks for quite a few years now and I am in heaven.I have matched them up against some tough contenders and they really strutt their stuff. I just love them to bits!Please share your experience with us...Regards,Dewald Visser

I own the RM-9 MKII. All I can say is the more things change the more they stay the same. I can't seem to find any faults with this amp.Strengths:Soundstage,true to the music,bass,decay, clean highs without being glazed over !Weaknesses:Gets pretty warm in my listening room. But what tube amp doesn't! Draws 220 watts at idle , I wouldn't leave this thing running allday. The price you pay for great music.
