I have read about the 12pi sub for quite some time, and have been nothing less than amazed, especially at the shootout results. I would absolutely love to build some of these if possible, so I was wondering if there were plans available. CAD files would be EXCELLENT!

Thank you!!!

Hi Wayne, Can you send me the plans as well. Not in cad, just drawings if possible. I'm not sure I can do much better than the 7.5 cubic foot vented enclosures I now have but I would like to look into the possibility.

Hello Wayne,

Great fan of the improvements to the Lab horn, I am a UK based Audio enthusiast. I was wondering if I could get a copy of your latest version of the 12pi plans?

CAD, SketchUp, or drawings are perfectly fine,

I have been looking at the Eminence Lab 15 for a while and considering what modifications could be made to the horn to fit a single 15" driver.

It is a DIY project and I spend what time I can here and there researching viable options and wondered what your current thoughts and possible actions were on the subject.

Thanks,
Beinn
