These intrigue me. Can I have a look at the plans?

I'm impressed with the amount of effort put into the crossover/waveguide optimization as well as the technical support available.

Is the H290C replacement available right now?

Thanks!

You've got mail!

H290C waveguides should be shipping next week.

Thank You. I'll have more questions I'm sure, but I'll search past posts first to cut down on redundancy.

OT - I see you're from Oklahoma. I used to make trips to Norman quite often.

"H290C waveguides should be shipping next week."

That is great news! I can't wait to see them.
