Spkrman57 dropped off a new toy earlier in the week. There is nothing subtle about this amp.....

Wow! That things is beefy! Parallel push-pull 6550's. That's pretty much the big block of tube amps, I'd say, at 125watts output.How does it sound?

The sound is the complete opposite of the Yamamoto A-08 (45 SET). Not to say it's worse, just different. I've only got about 5 hours listening, so I'm still getting use to it. Hope to a review later...C
