Owens Corning has a ceiling system of a stretched fabric over a fiberglass blanket. Anyone have any experiencewith this type of system?

This looks like it would be good to put in place of tiles in a suspended ceiling. Our choir room has a suspended ceiling so maybe I will try it there. Thanks for the tip!Ralph

It's all part of Cornings accoustical campain. I'm wondering how you can stretch it tight enough so it wont sag in the middle of a room.
