We have a 1957 Baldwin Orga-sonic Spinet Organ Model 40/41 with the original Tube Replacement Diagram. The organ is in good condition and all notes sound okay to me. Does anyone know an estimated price? I don't know where to begin to sell it. ThanksChristopher

Mine was a slightly older model (1952-3?) and I bought it at the local Goodwill for \$15. It had been sitting there for months. I checked on ebay at the time and they were selling for between \$50-100. But your model may be different, especially to a collector.

I ended up parting mine out for the tubes and iron. No one around here wanted it for anything.

yes, it's unfortunate, but most of these old organs are worth more dead than alive... I'm not familiar with this exact chassis, but I've bought a few Hammond organ amps on eBay- paid decent

money for them, too. They make the best guitar amps! The iron on these organs is incredible for guitar amps... tube rectified...P-P 6L6's can't be beat, simple 12AX7 VA for front end. Since they're so large and most local markets are limited, and new Casio etc. keyboards do so much, the parts will no doubt sell for much more than the whole.
