Hi Everyone, I am happy to announce that Oddwatt is spawning a sub division. Called VC Audio Labs. This is so we can distinguish kits from fully assembled components. High demand for assembled products was behind the split. VCAL products will still have the same underlying design goals as the kits (premium sound, quality components, and as low a cost as we can make possible). The first VCALs have already been delivered. They were a pair of KT120 mono blocks. VCAL products have a few extra features that the kits don't. Options for personal choices of upgraded capacitors and other internal components for one (at extra cost if necessary). Also the VCAL line stage and integrated preamps will be available with wireless digital remote controls. Stay tuned for updates. They will eventually show up on the Oddwatt Audio Web Site as well as here.

Very cool, Bruce. Is "VC" an abbreviation for something? What does it mean?

Hi Wayne, Thanks, yes. Not very original but it is mine and Rodney's middle initials. Vincent for me, Charles for him.
