Hi Wayne,

Can I get the 4Pi plans?

I also had a question about speaker height. I plan to use the 4Pis against the front wall around 3' from the corners. Most of the pictures I see have the 4Pis sitting on the ground which would place the tweeter center about 21" above the floor. Would there be a problem with using a 14" stand with the 4Pis to get the tweeter height closer to ear level? Would tilting the speakers be a better option?

Thanks,
Darrell

maybe a 3° to 5° tilt back. This is the preferred method with flanking subs.

know and I'll send plans for those also.

Darrell,
Did you get the 4pi's built?

Hi Wayne - Can you send me the Pi4 plans as well. I have a pair of 2226 that are begging to get used.

Thanks!

Hi Wayne!

May I please request the 4pi plans?

I will be filling an order for the PCB and horns but first I need to see about the crossover component availability in my area.

Many thanks,

Alex
