Subject: Big Bang Theory Glitch?

Did any of you watch The Big Bang Theory last Thursday? For some reason, the sound was turned way down, except for the laugh track, so you couldn't really hear what they were saying. We checked it on regular and HD channels and they were the same. Meanwhile, all other channels worked perfectly, so we're pretty sure it was on their end. It was really odd.

Hi Didn't see it, but it might be a big player on Dec 21 when the world is supposed to end.
