My better half and I both play guitar, but I prefer electric where she prefers acoustic. Anyways, last Christmas we went in halves to buy her a new acoustic guitar, so this year we're going in halves again to buy me a new electric guitar. I've got my heart set on an EVH guitar. Anyone know where I could find a good selection?

No idea where you could get your hands on a good selection to try and compare, but you are sure in for a treat. I regret, (did I say regret? I mean really, really regret) letting one of the early Peavey Wolfgangs get out of my hands for a ridiculously low price. Quite possibly the easiest playing guitar I've ever held.

Good luck with your search and pics after the purchase required!!
