I am looking for a clock radio that has an option to set the alarm with either the radio or an MP3 player. Does anyone know of any good ones I could look into?

Here is a clock radio that allows you to use the mp3 player to wake up, but I'm not sure how good it is. Can't you just set an alarm on your phone using your music library?

If they have a smartphone, they might be able to do that, but I know I can't do anything like that with my phone. This page is CNET's mp3 clock radio review page. Check it out and maybe you'll find something you like... Good luck!

iLoveiPod - Thanks for that link. I have been looking for an MP3 clock radio for a while now, but with so many different ones on the market, it's hard to know which one to pick. I'll definitely be checking that out!

I like the idea of this but music never really wakes me up the same way as a regular alarm does. I just tend to drift along half asleep and enjoy the sounds!

I've actually seen several clock radios that play MP3's. I am sure they can be easily found at Best Buy, or even Walmart. You might even want to look on eBay.
