Subject: Resistors for 2Pi Towers

Hi Everybody,
first of all thanks again to Wayne who sent me the plans for the construction of 2Pi Towers.
I received the woofers Eminence Alpha this week, and Vifa tweeters should arrive next week, in the meantime I'm starting to glue the birch panels.

Now I'm choosing the components for the crossover, but I can not find the non-inductive resistors of 16 ohms!
Can you suggest me how to compose more resistors together to get the required value for the project?

Thanks in advance... and sorry for my bad english!

Giampiero - Italy

What parts do you have available?

Two 8 ohm resistors in series will do it.

I've got only 8,20...
What do you think about 2 x 33ohms in parallel?

Regards
Giampiero
