If you want a free pair of V-Moda M-80 headphones, there's a sweepstakes going on right now. I haven't ever used this brand, but I'm not going to say no to free headphones if I can get them.

Thanks for the info and link, Chicken. I'm not familiar with that brand myself, but they look like a nice pair of headphones and I noticed that the MSRP is over \$200 for them. I'll definitely be entering the sweepstakes!

That's interesting. I entered too. Kenwoody, the MSRP is not necessarily an indicator of quality with headphones, but I have read good reviews of this particular model.
