Another sentimental journey for me, as I grew up spinning Genesis, Yes, Gentle Giant and the Moody Blues most of the time. This isn't a performance from the 1970s, but if you're a Genesis/Gabriel fan, this is probably your best Blu-Ray:

Hey that sounds pretty cool. I'm a Genesis fan; Salisbury Hill, for instance, is a great song and I see it's on there. I like Sledgehammer too.

Wayne - This is the first concert I ever remember watching, back when I was a kid. It came on the Disney channel back when we had TV coming through this huge satellite in the backyard. We recorded it on VHS and watched it til the tape wore out, then bought it on DVD. Nice to see it on Blu-Ray finally. I'll definitely be getting a copy.
