Subject: Woofer to partner Lowther in Sousahorn

I'm putting PM2As (16 ohm, 98dB/w/m, silver voice coil, alnico magnet) in 160hz horns and need a woofer to partner with it. I'm thinking probably horn loaded as I'd like to use a passive crossover and would prefer to keep it first order. It'll also need speed to keep up with the Lowther.

Thoughts? Suggestions?

Thanks!

Might use something like a LaScala bass bin?

I always thought those looked real cool, and they'd be fine up to that range.
